

文 獻 紹 介

CORROSION

Vol. 38, No. 3 March, 1982.

The Effect of Phosphorus on Intergranular Caustic Cracking of NiCr Steel...N. Bandyopadhyay and C.L. Briant125

The Stress Corrosion Cracking of Sensitized Stainless Steel in Thiosulfate Solutions...H.S. Isaacs, B. Vyas, and M.W. Kendig.....130

Stress Corrosion Cracking of ASTM A508 Steel in Oxygenated Water at Elevated Temperatures...H. Choi, F.H. Beck, Z. Szklarska Smialowska, and D.D. Macdonald136

Nucleation and Growth of Stress Corrosion Cracks in Austenitic Steels with Varying Ni and Mo Contents ...J.M. Silcock.....144

Low Alloy Steels in Hydrogen Sulfide Environment...Yuichi Yoshino.....156

Galvanic Factors in the Corrosion of Steel in Liquid Ammonia...B.E. Wide and C.D. Kim.....168

Reaction Rate Studies for the Corrosion of Metals in Acids-1, Iron in Mineral Acids...P.B. Mathur and T. Vasudevan171

Technical Note: Inhibition of the Cathodic Reaction on Zinc in Aerated 3% NaCl Solution...H. Leidheiser, Jr., Y. Momose, and R.D. Granata.....178

Discussion: Surface Composition of Stainless Steel During Propagation of Crevice Corrosion...G. Wranglen...180

Discussion: The Significance of External Polarization on Stress Corrosion Crack Growth by Anodic Dissolution...Bryan Poulson181

Obituary: I.L. Rosenfeld.....182

Vol. 38, No. 4 April, 1982.

A Computer Program for Constructing Stability Diagrams in Aqueous Solutions at Elevated Temperatures ...C.M. Chen and K. Aral.....183

Corrosion Product Formation in Simulated Energy Systems...P. Fabis, C. Brown, T. Rockett, and R. Heidersbach191

The Influence of Phosphorous Alloy Additions on the Zinc Phosphate Coating Formation on Cold Rolled Steels...James A. Kargol and Donald L. Jordan201

Influence of a CuSO₄ Treatment on Atmospheric Steel Rust Formation A Mössbauer Spectroscopy Study ...C. Saragovi-Badler, I. A. Maier, and F. Labenski.....206

Formation of Spherical Colloidal Nickel Ferrite Particles as Model Corrosion Products...Alberto E. Regazzoni and Egon Matijevic.....212

An Electrochemical Method for Hydrogen Determination in Steel...Tadeusz Zakroczymski218

Corrosion Phenomena for Iron Covered with a Cellulose Nitrate Coating...J.J. Ritter and M. J. Rodriguez...223

The Galvanic Corrosion of Steel in Sodium Chloride Solution...Bunzo Tsujino and Sunao Miyase226

Technical Note: The Effect of Alloying Elements on Impurity Induced Intergranular Corrosion...C.L. Briant...230

Technical Note: Cathodic Protection of Mild Steel in Flowing Natural Sea Water...G.M. Schmid233

Discussion: A Potentiometric Study of the Corrosion of Ni-Resist in Sea Water...Frank LaQue234

Corrosion Research Calendar.....Inside Back Cover

Vol. 38, No. 5 May, 1982.

Werkstoffe und Korrosion

Volume 32. No. 4 April 1981.

| | Inhalt | | Contents |
|---------------------------------------------------------|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| H. J. Heller, G. Herbsleb, F. Kleinfeld, B. Pfeiffer | 157 | *Der Einfluß von Martensit auf das Korrosionsverhalten von 18Cr-10 Ni-Stahl | The effect of martensite on the corrosion properties of 18Cr-10Ni steel |
| M. Ahrens, W. Schmitt, K. E. Heusler | 167 | *Das Korrosionsverhalten von Eisen und Stahl in flüssigem Ammoniak | Corrosion behaviour of iron and steel in liquid ammonia |
| J. Richter, H. Kaesche | 174 | *Untersuchungen über den Einfluß der Mikrostruktur auf die interkristalline und Kornflächenkorrosion von reinen Aluminium-Zink-Magnesium-Legierungen in 1M Natriumchloridlösung | Investigation into the influence of the microstructure on the intercrystalline and grain-phase corrosion of pure aluminium-zinc-magnesium alloys in an 1M sodium chloride solution |
| H. Przewlocka, J. Siedlecka | 182 | *Untersuchungen über die Oxidation und die mechanischen Eigenschaften von Aluminiumgußeisen bei Temperaturen von 923 bis 1373K | Investigations into oxidation and mechanical properties of aluminium cast iron at temperatures of 923 to 1373K |

Volume 32. No. 5 May 1981

| | Inhalt | | Contents |
|------------------------------------|---------------|---------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| M. Ahrens, K. E. Heusler | 197 | *Der Einfluß von Wasser und gelösten Gasen auf das Korrosionsverhalten des Eisens in flüssigem Ammoniak | The influence of water and dissolved gases on the corrosion behaviour of iron in liquid ammonia |
| U. Nürnberger, R. Frey | 201 | *Untersuchungen zur Rißkorrosion hochfester Seildrähte durch Schwitzwasser | Investigations into stress corrosion of high strength rope wires in condensating water |
| G. Rehm, U. Nürnberger, R. Frey | 211 | *Zur Korrosion und Rißkorrosion bei Spannstählen | Corrosion and cracking-corrosion of prestressing steels |
| | 221 | *Ergebnisse des Forschungs- und Entwicklungsprogramms "Korrosion und Korrosionsschutz" | Results of the R & D-Program "Corrosion and Corrosion Protection" |

Volume 32. No. 6 June 1981

| | Inhalt | | Contents |
|------------------------------------------------|---------------|-------------------------------------------------------------------------|------------------------------------------------------------------------|
| Kh. G. Schmitt-Thomas, G. Johner, H. Meisel | 255 | *Einfluß von Heißgasatmosphären auf Zeitstandverhalten und Gefüge einer | Influence of hot gas atmospheres on creep rupture behaviour and struc- |

| | | | |
|-----------------------------------------|-----|-----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| | | mit Beschichtung versehenen Nickelbasislegierung | ture of coated nickel base alloy |
| L.-G. Johansson, N.G. Vannerberg | 265 | Atmosphärische Korrosion von ungeschütztem Kohlenstoffstahl: Vergleich zwischen Feld- und Laboratoriumsuntersuchungen | *The atmospheric corrosion of unprotected carbon steel—A comparison between field study and laboratory tests |
| R. Weidemann | 269 | *Untersuchung zur Schwingungsrißkorrosion an unlegierten und niedriglegierten Stählen | Investigation into corrosion fatigue of unalloyed and low-alloy steels |
| H. Keller, H.J. Grabke, H.-P. Stoppa | 275 | *Chemische und elektrochemische Reaktionen von Eisensulfid und Mangansulfid in sauren und neutralen Lösungen | Chemical and electrochemical reactions of iron sulfide and manganese sulfide in acid and neutral solution |

Volume 32. No. 7 July 1981

| | | Inhalt | Contents |
|--------------------------------------------|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| J. Richter, H. Kaesche | 289 | *Einfluß der Mikrostruktur und des Elektrodenpotentials auf die Ausbreitungsgeschwindigkeit von Spannungskorrosionsrissen einer reinen AlZnMg 3-Legierung in 1 M NaCl-Lösung | Influence of microstructure and electrode potential upon the velocity of stress corrosion cracks of a pure AlZnMg3-alloy in an 1M NaCl-solution |
| W. Meisel, P. Gütlich | 296 | *Phasenumwandlungen in Korrosionsschichten auf Eisen: Mößbauerspektroskopische Untersuchungen | Phase transformations in corrosion layers on iron: Mössbauer spectroscopic studies |
| R. Müller, H. Schmied, A.F. Williams | 302 | Anwendung der "Conversion Electron Mössbauer Spectroscopy" (C. E. M. S.) auf die Untersuchung der Inhibierung der Korrosion in Kondensatorrohren aus Messing | *Application of conversion electron Mössbauer spectroscopy to the study of corrosion inhibition in brass condenser tubes |

Volume 32. No. 8 August 1981

Volume 32. No. 9 September 1981

| | | Inhalt |
|------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| W. Knorr, H. J. Köhler, | 371 | *Ein nichtrostender Vergütungsstahl mit hohen Festigkeits- und Zähigkeitswerten für den Maschinen- und Apparatebau |
| G. Reinhard, Chr. Irmischer | 377 | *Ellipsometrische Untersuchungen zur Einwirkung niedermolekularer gesättigter Monocarbonsäuren auf Stahl in Luft hoher Feuchtigkeit |
| E. Beranek, K. Barton, K. Micek | 382 | Probleme der Wirkung und der Ausbreitung von Sulfatnestern in Korrosionsproduktschichten auf Stahl |
| F. P. IJssling | 389 | *Elektrochemische Methoden der Prüfung auf Spaltkorrosion Bericht erstellt für die Arbeitsgruppe „Grundlagen und Anwendung physikalisch-chemischer Korrosionsprüfmethoden“ der Europäischen Föderation Korrosion |

Contentes

A martensitic stainless steel with high strength and impact properties for chemical and mechanical engineering purposes
Ellipsometric investigation into the influence of low molecular saturated monocarbon acids on steel in air with high relative humidity
*To the problems of the function and the spreading of sulphate nests in the layer of corrosion products on steel
Electrochemical methods in crevice corrosion testing
Report prepared for the Working Party "Physico-chemical methods of corrosion: Fundamentals and applications" of the European Federation of Corrosion

Volume 32. No. 10. October 1981

| | | Inhalt |
|------------------------------------------------------------|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| D. Kuron, H.-J. Rother, H. Gräften | 409 | Inhibierung von wässrigen und alkoholisch wässrigen Wärmeträgern |
| Kh. G. Schmitt-Thomas, H. Meisel, W. D. Haubenberger | 421 | *Einfluß unterschiedlicher Anlaßtemperaturen auf die Korrosionszeitfestigkeit eines molybdänlegierten 13%igen Chromstahls in chloridhaltigen Medien |
| W. Schendler, W. Schwenk | 428 | *Elektrochemische Untersuchungen der Korrosion hitzebeständiger Fe- und Ni-Basislegierungen in eutektischer Alkalisulfatschmelze bei 700°C |
| A. Bächle, E. Deschner, H. Weiss, I. Wagner | 435 | *Das Korrosionsverhalten von verzinkten und unlegierten Stahlrohren in Trinkwässern mit unterschiedlicher Härte und erhöhtem Neutral-salzgehalt |
| H. Przewlocka, H. Bala | 443 | *Hemmung der sauren Korrosion un- |

Contents

Inhibition of aqueous and alcoholic aqueous heat-carriers
Influence of various annealing temperatures on the long-term strength under corrosion of a molybdenum alloyed 13% chromium steel in chloride containing media
Electrochemical investigation of the corrosion of heat resistant Fe- and Ni base-alloys in eutectic alkali sulphate melt at 700°C
Corrosion of galvanized and unalloyed steel tubes in drinking water of different hardness and increased neutral salt content
Inhibition of the acid corrosion of

verschiedlicher Kohlenstoffstähle unter Verwendung von Thiobarnstoff

various carbon steels

Volume 32. No. 11 November 1981

| | Inhalt | Contents |
|---------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| J. F. Norton, L. Blidegn, S. Canetoli, P.D. Frampton | 467 Einflußgrößen für das Aufkohlungsverhalten von Chrom-Nickel-Stählen und-Legierungen in Gasen bei hohen Temperaturen | *Factors affecting the high-temperature carburisation behaviour of chromium-nickel alloys in gaseous environments |
| Z. Szklarska-Smialowska, E. Lunarska | 478 Einfluß von Sulfideinschlüssen auf die Anfälligkeit von Stählen für Lochfraß, Spannungsrißkorrosion und Wasserstoffversprödung | *The effect of sulfide inclusions on the susceptibility of steels to pitting, stress corrosion cracking and hydrogen embrittlement |
| L.M. Komissarenko, V. A. Marichev | 485 Kinetik und Mechanismus des Rißwachstums während der Spannungsrißkorrosion von Zirkoniumlegierungen | *Kinetics and mechanism of crack growth during stress corrosion cracking of zirconium alloys |
| P.-E. Augustsson, N.-G. Vannerberg | 489 Korrosionsprüfung von phosphatisierten Stahlblechen | *Corrosion testing of phosphatized steel samples |

Volume 32. No. 12 December 1981

| | Inhalt | Contents |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| E. Schmidtman, H.-D. Hesse | 521 *Untersuchungen zum Korrosionsverhalten nichtrostender Stähle in Phosphorsäure in Abhängigkeit von dem Chlorid- und Fluoridgehalt und einer Wärmebehandlung beim Schweißen | Investigations into the corrosion behaviour of stainless steels in phosphoric acid in dependence on the chloride and fluoride contents and a heat-treatment during welding |
| A. Gala, W. Schendler | 528 *Der Einfluß von Cer, Zirkonium und Bor auf die Oxidationsbeständigkeit hitzebeständiger Stähle an Luft | Influence of cerium, zirconium and boron on the oxidation resistance of heat-resistant steels in air |
| V. A. Marichev | 537 Lagerer Bruchzonen bei Wasserstoffversprödung | *Disposition of fracture zones under hydrogen embrittlement |
| H. Keller, H.J. Grabke | 540 *Untersuchungen über die Kathodenwirkung von Eisensulfid und Mangansulfid auf die Korrosion von Eisen in dreiprozentiger Natriumchloridlösung | Studies on the cathodic effect of iron sulfide and manganese sulfide on the corrosion of iron in a three percent sodium chloride solution |
| W. Forker, H. Worch, D. Rahner | 545 *Kinetische und kristallografische Modellbetrachtungen zur Korrosion und Passivität von Metallen | Kinetic and crystallographic models of metal corrosion and passivity |
